

Libro o capítulo de libro publicado por editorial sin referato externo	0.50
Artículo en revista indizada en Latindex Catálogo	0.50
Edición de número especial o Dossier en una revista indizada en WoS o Scopus	0.50
Artículo en revista con otra indización y con revisión de pares.	0.40
Catálogo publicado con respaldo institucional o editorial	0.30
Otras publicaciones académicas (reseña, comentario o réplica)	0.20

Parámetros a aplicar.

- Se considerarán hasta 2 capítulos del mismo libro.
- Se considerarán un máximo de 2 artículos en el mismo número y año de la revista

¹ Libro monográfico es aquel texto de autoría individual o en co-autoría que tiene como objetivo tratar un tema determinado exponiendo información que se considere relevante de la temática, producto de una investigación previa.

LINGÜÍSTICA, LITERATURA Y FILOLOGÍA

Para criterios generales, revisar introducción del presente Anexo, en donde se informan exclusiones y documentos requeridos para acreditar los productos informados, entre otros,

Tenga presente que, para este GE, solo se validarán aquellos productos que están expresamente señalados a continuación:

Ítem	Puntos
Libro monográfico o edición filológica en editorial con referato externo	1.00
Artículo en revista indizada en WoS, Scopus o Erih ^{1,2}	0.75
Libro editado con referato externo o Edición de número especial o dossier de una revista indexada en WoS o Scopus. ³	0.50
Artículo en revista indizada en Scielo ^{1, 2}	0.35
Capítulo de libro en editorial con referato externo ⁴	0.35
Libro monográfico o edición filológica en editorial sin referato externo	0.25
Artículo en revista con otra indización y con revisión de pares ^{1,2}	0.15
Capítulo de libro publicado, sin referato externo	0.10

¹ Se considera un máximo de un artículo publicado por revista perteneciente a la Institución Patrocinante del/de la postulante.

² Se considera un máximo de dos artículos en el mismo número y año (volumen) de la revista.

³ Si el editor de un libro o dossier tiene además un capítulo o artículo, solo se validará una de las categorías.

⁴ Se considera un máximo de un capítulo en un mismo libro, adjuntando el referato.

MATEMÁTICAS

Para criterios generales, revisar introducción del presente Anexo, en donde se informan exclusiones y documentos requeridos para acreditar los productos informados, entre otros,

Tenga presente que, para este GE, solo se validarán aquellos productos que están expresamente señalados a continuación:

Se clasifican las revistas en las cuales han publicado los/las postulantes al presente concurso en categorías MB, B y R, de acuerdo a los siguientes conceptos:

Muy Buena (MB): Revista de alto prestigio en el área específica del/de la candidato/a o en matemáticas/estadística en general.

Buena (B): Revista prestigiosa en el área del/de la candidato/a o en matemáticas en general.

Regular (R): Revista de publicación regular, de aparición regular e indexada en bases de datos científicas usuales (Mathscinet y/o ISI) pero de menor impacto.

La clasificación de las revistas permite establecer preliminarmente el rango de puntaje que puede alcanzar cada postulante. Se evaluará en su conjunto la productividad de todos/as los/as

participantes y de acuerdo a la calidad de su producción científica asignará un puntaje según una escala de 1 a 100 puntos.

A continuación, se entrega el listado de revistas a utilizar en la evaluación curricular:

Listado de Revistas:

Esta clasificación no es una lista completa de todas las revistas, pero entrega una cantidad representativa de las publicaciones en revistas del área de matemáticas y estadística. Esta clasificación será revisada en forma periódica -en particular cuando nuevas postulaciones a concursos incluyan publicaciones en revistas no clasificadas previamente- y actualizada por el Grupo de Evaluación e informada en la web.

En el caso de publicaciones en revistas que no son de matemáticas ni estadística, o publicaciones interdisciplinarias donde la matemática y estadística es usada como herramienta, se procederá del siguiente modo. Se asignará una clasificación inicial a la revista dentro de su disciplina, tomando en cuenta el factor de impacto JCR y su posición que este índice le confiere dentro del área. Luego, para la evaluación curricular, el GE considera esta publicación bajando en un grado su categoría, es decir, si la revista se estima que es MB en otra área, el GE la considera como una publicación B. En consecuencia, el máximo que se puede asignar a una revista de otra área es la categoría B.

En las áreas representadas por el GE de Matemáticas donde se publica principalmente en proceedings de conferencias, se consideran para la evaluación curricular también las publicaciones en tales proceedings. La clasificación de las publicaciones correspondientes se hará de manera individual.

(*) Clasificación según artículo.

MEDICINA G1 y G2 – G3

Para criterios generales, revisar introducción del presente Anexo, en donde se informan exclusiones y documentos requeridos para acreditar los productos informados, entre otros,

Tenga presente que, para este GE, solo se validarán aquellos productos que están expresamente señalados a continuación:

Cálculo de la productividad:

A.- Factor de Impacto JCR normalizado

Se consideran las publicaciones de artículos en revistas del Journal Citation Report (JCR) versión 2021. Para el cálculo del puntaje se suman los factores de impacto, normalizados de acuerdo a la mediana de la disciplina de cada una de las publicaciones. El factor de impacto normalizado se obtiene dividiendo el factor de impacto (FI) de la revista por el índice de la mediana de la disciplina (MD) a la que pertenece el trabajo publicado. De igual modo, se considerarán o validarán artículos clasificados por la revista JCR que presenten resultados originales de estudios de investigación y que hayan sido revisados por pares, incluyendo "review" o mini-review.

En los casos en que una revista se clasifique en más de una disciplina, el Grupo de Evaluación escogerá el puntaje JCR normalizado de mayor valor.

B.- Factor Autor/a Principal

Se utilizará el factor Autoría (Ai) para ponderar publicaciones JCR, que toma valor:

Autoría = Ai =1,0 si se es co-autor/a de la publicación i

Autoría = Ai =2,0 si se es primer autor/a o autor/a correspondiente de la publicación i

Así productividad se calculará para las "i" publicaciones:

$$Productividad = \sum_{i=1}^n \frac{FI(i)}{MD(i)} Ai$$

FI i = Factor de impacto de la publicación i

MD i = Mediana de la disciplina de la publicación i

Notas:

- Las revisiones Sistemáticas y Meta-Análisis equivalen a un artículo original.
- Se considerarán hasta 3 Reportes de Casos y/o Casos Clínicos dentro de las 10 publicaciones.
- Se considerarán hasta 3 reviews y mini- reviews dentro de las 10 publicaciones.
- En caso de presentar más de 3 reviews y mini- reviews, se considerarán aquellos que tengan mayor factor de impacto normalizado.
